

# SunSmart Global UV app

Levels 3 - 6

Look at the different features on the new SunSmart Global UV app and then design your own.

Does your family have the free SunSmart Global UV app?

1. Location  
You can find out the sun protection times for around 2500 locations across Australia and the world.

2. Sun protection times  
The times the sun's UV is forecast to reach three or above – when you need to use sun protection.

3. Current UV level  
Updates every two minutes throughout the day. Pull down the screen to refresh.

4. Weather conditions

5. Add different locations

Sun protection is needed whenever UV levels are 3 or higher.

UV can't be seen or felt so whatever the weather, remember to follow the sun protection times.

6. Maximum UV level for the day

7. Minimum and maximum temperatures

8. Sun protection reminder alert

- Create your own SunSmart app design. Remember to include key information.
- What extra features will your app have?
- How will your app help protect people from the sun's UV and remind them to be SunSmart when they need to be?
